# Phishing

Behind closed curtains Marek Beňo

## Phishing

**Phishing** is the attempt to obtain sensitive information such as usernames, passwords, and credit card details (and money), often for malicious reasons, by disguising as a trustworthy entity in an electronic communication. <u>Wikipedia</u>

### Types

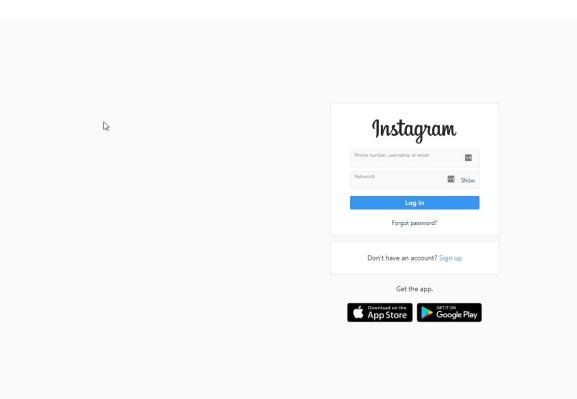

- 1. Website forgery
- 2. Redirect
- 3. Social engineering
- 4. Spear phishing
- 5. Whaling
- 6. Voice phishing
- 7. SMS phishing
- 8. Malvertising

# How to distinguish Phishing 1/2

### How to distinguish Phishing 2/2

- Different page design
- Elements not aligned properly, css styles missing
- Typos, spelling mistakes
- Unsecured login pages
- Pop-up alerts
- Comments in source code (//saved from, //hacked by HouDini)
- Link hrefs are changed (relative local site or "#")
- Missing or very primitive input verification
- Form action is .php file
- File size
- Iframes, redirects, refreshes
- Login forms accept any login:password combination
